

Whitepaper POOL Token

Token Specification

Name: POOL Token

Symbol: POOL

Type: ERC20

Decimals: 8

Token Supply: 200.000.000

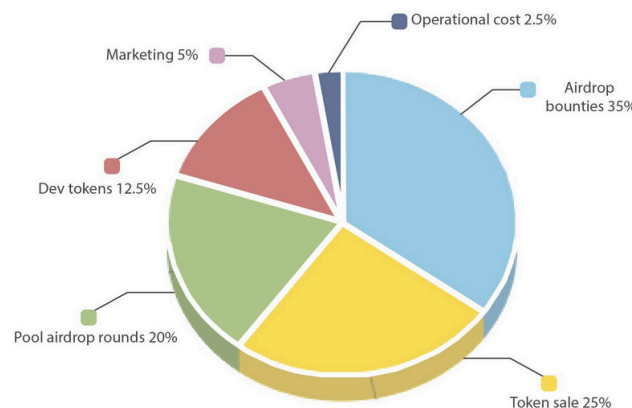

Contract address:

[0xcda300292a1834cf1260eb709c655d546b8394d2](https://etherscan.io/address/0xcda300292a1834cf1260eb709c655d546b8394d2)

Project Goal

A lot of times token airdrops and bounties don't send their promised tokens. But from now this will not be a problem anymore because if you sign up for other airdrops through POOL then you will always be paid in POOL and possible also for the airdrops itself. Monthly there will be new airdrop and bounty rounds. If a crypto project wants to promote their airdrop or bounty they can do so by buying POOL tokens.

Token distribution

POOL Airdrop rounds 20%

In 3 airdrop rounds we have reserved 40.000.000 POOL to give 2.000 POOL to everyone that signups during the 1st round, 1000 POOL during the 2nd round and 500 POOL during the 3rd round. All POOL tokens left will be burned.

Airdrop bounties 35%

During the airdrop bounties new people can still signup for POOL but they will have to signup with other token airdrops or bounties to receive POOL Tokens. New airdrops will be announced at least once a month, unless there are no new airdrops or all the budget has been spent.

Token Sale 25%

The tokensale will take place in December 2018 and January 2019 any unsold tokens will be burned. The lowest price that POOL will be sold for during the tokensale is \$0,001 per token this includes the maximum bonus. Any unsold tokens will be burned.

Dev tokens 12,5%

This tokens will be sold on the market for the benefit of the dev team.

Marketing 5%

This tokens will be sold on the market to pay for promoting the airdrop and the project. If the budget is big enough it will be used to add POOL to a decent exchange like mercatox. Any unused tokens will be burned!

Operational cost 2,5%

This tokens will be sold on the market to pay for all kinds of operational cost. Like paying freelance workers / hosting cost / email software and any other cost. Any unused tokens will be burned!

FAQ

Why should I buy POOL?

The best reason to buy POOL is to promote your airdrop or bounty through our platform. To promote you must pay with POOL tokens that will be divided under our members that join these airdrops and bounties. You can also buy tokens if you like to support the POOL project. It's impossible to predict anything about the future value but we can promise that we will never sell tokens cheaper than \$0,001 during the pre sale and token sale.

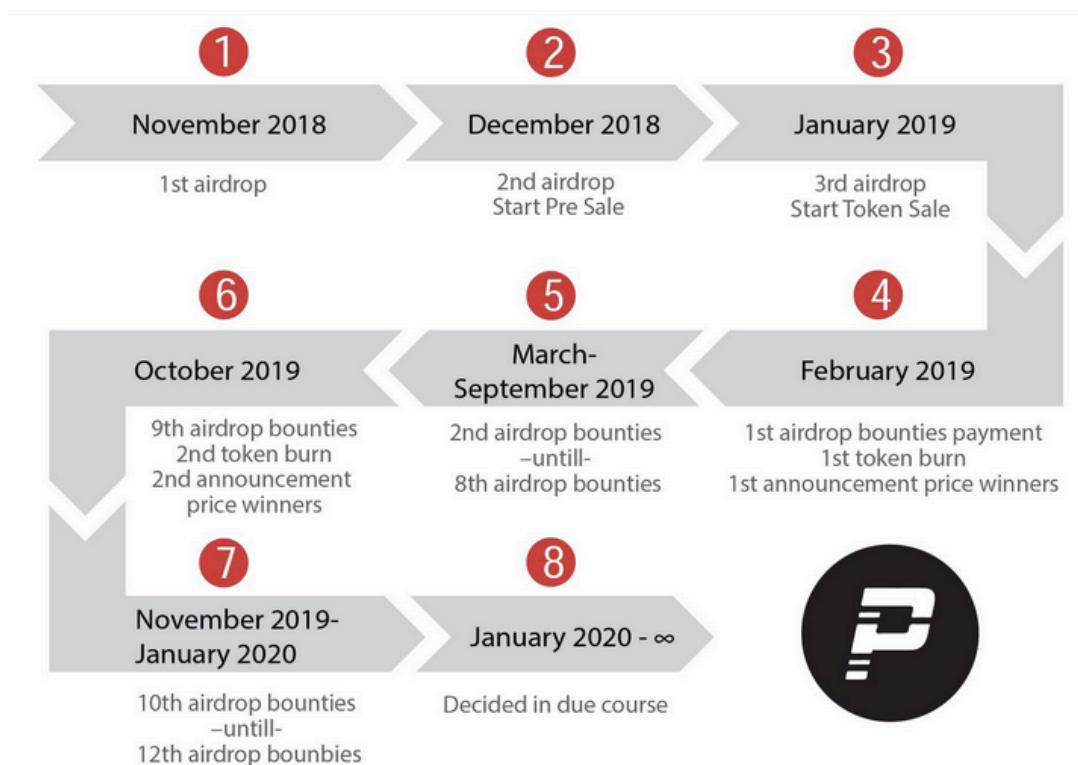

What wallet can I use?

POOL is an ERC20 token so you can use any wallet that accepts ERC20 tokens. Metamask is a very secure add-on and myetherwallet.com is probably the most in ease in use.

Where will POOL be traded?

POOL will be added to ForkDelta and Creedex and it is also possible that POOL will be added to Mercatox and IDEX in the future.

Roadmap

November, December and January will be used to promote the POOL project first off all by letting members sign up for the free Airdrop. The pre sale and token sale will also take place in December and January.

From february the monthly airdrop bounties will start and during some of this months POOL Tokens will be burned. We will also announce price winners from our competitions during some of these months. In january deceptions will be made about the future for the POOL project.
